

Use of Medications

The first e-Bulletin is now available for the national Project Building Awareness of the Safe Use of Medications Among Family Caregivers of Seniors and Chronically Ill Children is now available at <http://www.safemedicinesproject.ca/email/april2007/>. For further information about the project and upcoming Training-of-Trainers workshops, visit www.safemedicinesproject.ca.

État de situation sur les milieux de vie substitut pour les aînés en perte d'autonomie (Available only in French)

In response to the growing need for placement in long-term care for seniors with losses of autonomy, many types of substitute 'milieux de vie' have been developed in Quebec within the last 25 years, growing steadily since 2000. This document from the Conseil des aînés du Québec describes the current situation with regard to the access and availability of spaces in these different substitute 'milieux de vie' that welcome seniors with losses of autonomy.

Operation Generations

The objective of Operation Generations and the different activities suggested are designed to facilitate the intergenerational exchange between persons suffering from a communication problem. This initiative was launched by the Ordre des orthophonistes et audiologistes du Québec (OOAQ). <http://www.operationgenerations.ca>.
